DETAILED ACTION

Election of Species

1. Claims 16-20 and 27-31 are generic to a plurality of disclosed patentably distinct species. The species are independent or distinct because the claims are drawn to compositions comprising various ingredients comprising formula I and formula II independently of each other having various substituents.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 16-18 and 27-29 are generic. Specifically, Applicant is required to elect a single disclosed compound for formula I; a single disclosed compound for radical R'; and a single disclosed compound for radical R'' even though this requirement is traversed.

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143). Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after

the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).

3. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

4. A telephone call was made to Steven Trzaska on October 2, 2006 to request an oral election to the above restriction requirement, but due to the complexity of the election requirement, did not result in an election being made.
